Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. However, that is where my satisfaction ends. I am exmilitary and have used NV on many occasions. I spent a considerable amount of time trying to focus the unit, adjusting the brightness and turning the infrared light on and off. All I could seem to Make out a the odd smear on the screen. Im sending my unit back, Im better off relying on the MK 1 eyeball!! Great product amazing zoom and great to have memory card storage too. Only downside is that the batteries only last 20 mins before they need to be replaced in this. It isnt difficult dont get me wrong but we were looking at our new visitor a Hedghog and they move quicker than you think. For price you get. For price you get what you pay for. I would not have bought it myself. It was a present to me. The clarity is absolutely superb, well worth every penny. The infra red works well and the picture was pleasingly clear and crisp. For this generation of scope not bad at all. Sorry, we failed to record your vote. Please try again Considerando il fatto che e un visore di prima generazione bisogna valutare il prodotto per la fascia in cui si trova. l'ho trovato molto sopra alle mie aspettative. <http://watersns.com/userData/board/creating-dbconsole-manually.xml>

Si vede bene e nitido anche con molto buio, distanze provate sul centinaio di metri. L'unica cosa che mi sento di dire e che ha bisogno di una buona regolazione nell'ottica adiacente all'occhio. Sorry, we failed to record your vote. Please try again Das Gerat macht zudem einen robusten und optisch guten Eindruck und liegt gut in der Hand. Das PreisLeistungsverhältnis stimmt hier und für normale Verhältnisse ist das Gerat gut zu gebrauchen. Wer allerdings eine Sichtweite von weitaus mehr als 50 100 Metern benötigt, muss sich in einem deutlich höheren Preissegment umsehen. Ich würde das Gerat auf jeden Fall wieder kaufen. Sorry, we failed to record your vote. Please try again Me daba miedo que no cumpliera espectativas, pero las ha cumplido. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Non ho mai creduto che Bresser potrebbe produrre una porcheria del genere, soldi sprecati, prodotto che e peggio di un banale giocattolo cinese. Attenzione ! Sconsigliatissimo ! Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Schade, hatte von Bresser mehr erwartet. Amazon wie immer 5 Sterne und Bresser leider nur 2. Sorry, we failed to record your vote. Please try again Also für Beobachtung geeignet, aber ich finde den Restlichtverstärker etwas schwach. Was mich aber zum Umtausch der Ware gebracht hat, ist, dass man die Helligkeit des Okulars nicht einstellen kann. Ich empfinde das so extrem hell, dass mir die Augen schmerzen habe beidaugig ausprobiert. Fazit. Ansich gehts, aber nix für mich. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Die Reichweite ist ideal

ca 2530 Meter um den Garten zu überblicken. Für HobbyBeobachter sehr gut geeignet. Sorry, we failed to record your vote. <http://www.tsjikatilo.be/UserFiles/creating-database-manually-in-linux.xml>

Please try again Es ist gewohnungsbedürftig bei einem runden Objektiv auf einen rechteckigen Bildschirm zu schauen. Die Lichtempfindlichkeit ist sehr hoch. Bei absoluter Dunkelheit verrät einem das ständig brennende Infrarotlicht. Sorry, we failed to record your vote. Please try again Mir ist aber der Sichtbereich deutlich zu klein. Selbst im Garten konnte man damit kaum was erkennen. Man muss im Prinzip wissen was man genau beobachten will dann ist es ok. Aber selbst einen garten von 100m² abzusuchen ist fast nicht möglich. Sorry, we failed to record your vote. Please try again. For a better experience, please enable JavaScript in your browser before proceeding. It may not display this or other websites correctly. You should upgrade or use an alternative browser. If so are they any good as a spotter. Also for longer distances over 50yds or so you will need a better IR illuminator or an IR filter on your lamp but it takes practice getting the IR beam and the monocular pointing in the same place. Im working on a dual mounting system. I use mine for maybe 12hrs at a time, often continuously using 1200mAh NiCads and it will just about eat a set on each trip. Onboard screen is rubbish, but if you're on foot you'll have to live with it. I use a bike handlebar camera mount on mine to add either an IR torch or laser. Distancewise, I've seen rabbit eyeshine at the foot of a gate in the distance lots of moonlight to help too, and then next day gone back to measure the distance at just under 400 yards. I couldn't confirm the quarry at that distance, and wouldn't have taken the shot, but it was a rabbit. Used with an external monitor it's like daylight in black and white. Used with an external monitor it's like daylight in black and white.

I have a strip of felt stuck to the dial, one half turn and the felt lines up with the line of sight, I know that is where I need to have the brightness I also find it makes a lot of difference if you keep both eyes open when using it what monitor do you use Regards, Daz. What illuminator do you guys use and how much do they cost please. Many thanks. ATB Lee I wasn't full dark but very low light. It's mounted on my old.22 rifle Other than in the back garden I have not used the NV kit in the field, but I am sure that once the power level is set for the ambient light conditions and the focus is sorted I am sure that it will do just what it is intended for, as a spotter to get you on to a possible target without using the lamp. The device is fitted with a lens system, made of high grade glass material. The scope of delivery often does not include batteries or, if included, only low quality batteries. These cannot be replaced under warranty. To avoid being disappointed the very first time you use the equipment, we recommend you order suitable batteries at the same time you order the equipment. Especially for equipment that is used outdoors, we recommend the use of high quality brandname batteries. Lithium batteries are to be preferred, as these lose hardly any of their charge during prolonged storage and also do not lose performance in cold temperatures. You can find these in the list of recommended accessories.

full review Ezvid Wiki Onsite Associates Program Amazon calculates a product's star ratings based
on a machine learned model instead of a raw data average. The model takes into account factors
including the age of a rating, whether the ratings are from verified purchasers, and factors that
establish reviewer trustworthiness. It was able to reveal nocturnal creatures around my countryside
house but not good enough to tell the difference between a rabbit and a cat, dog, fox, hedgehog,
pheasant, etc. That bad! Before anyone comments. Yes, I am well aware that you have to focus the
screen AND the scope. The problem was not operator error. Either I had a bad one OR it is not as
good as some reviews suggest. Sorry, we failed to record your vote. Please try again I was very
disappointed with the passive night vision capability. The IR lamp does allow one to see in the dark
but only for a short distance.

<http://aiyta.com/images/95-ford-crown-victoria-manual.pdf>

I wouldnt recommend this equipment for someone who is intending to watch the night skies for
UFOs. Being ill, I was unable to send back this equipment to the manufacturer so I am lumbered
with it now. Far better to pay a little bit more and get something thats not childs play. Sorry, we
failed to record your vote. Please try again Two foxes, three badgers and three cats later. It
works. Sorry, we failed to record your vote. Please try again Es ist fur vergleichsweise kleines Geld
ein ordentliches Produkt fur den Nahbereich 050m um zu schauen, wer sich so im Garten
herumtreibt oder ob nun Waschbar oder doch Ratten spat abends an den Netzwerkkabeln
herumknabbern. Das Okular mit seinem Gummiring ist dazu gedacht, recht nahe ans Auge gebracht
zu werden. Die Innengewinde fur gangige Stativschrauben und Stecksysteme halte ich aus
verschiedenen Grunden fur uberflussig weil es eher ein Handgerat ist aber das ist ja alles auch
Geschmacks und Anwendungssache. Sorry, we failed to record your vote. Please try again Sorry, we
failed to record your vote. Please try again The image quality is very good and comparable to more
expensive 1st Gen NV gear. I use mine for spotting vermin for shooting purposes. For longer range
spotting it needs help from a decent IT torch such as a T20. I bought a flip up lens cover for mine
and fitted a lanyard so its always to hand. It has a couple of holes for fitting to a tripod and a recess
for sliding onto a suitable peg so it could be attached to something else. Sorry, we failed to record
your vote. Please try again With the IR illuminator on they come into their own, a decent functional
piece of kit. Battery life is good though I wish they had been designed for AA batteries not the CR32
3V you get with them. If you are using for stalking people or spying then beware the red and green
LEDs which indicate power on and IR illuminator on respectively as they could give you away. Put a
small piece of black tape or paint over them.
